Project Name	PERSONAL ASSISTANCE FOR SENIORS WHO ARE SELF-RELIANT

## **OBJECTIVES:**

As people become older, people generally will experience a health decline such as becomes weak, susceptible to disease, decreased vision ability, etc. Therefore, special health attention is needed for the elderly people, especially from the family member or personal doctors / nurses. On the other hand, the number of elderly people in the world is rapidly increase so there's more people will need special attention. Therefore, this research try to develop an application on mobile phone that could help elderly people and their family member to supervise and monitor the health of the elderly.

## **PROS:**

- Avoid the difficulties for doctors (or) caretakers to monitor the patients around the clock. Patient can easily take the medicine/drugs at correct time.

## **CONS:**

- If seniors/patients who are physically disabled (like deaf), they can't hear the voice command.
- If seniors/patients who are visually challenged (like cataracts) and illiterate, they can't read the medicine/drugs name properly.
