

Assignment -2

Python Programming

Assignment Date	25 September 2022
Student Name	VAISHNAVI. R
Student Roll Number	910019106048
Maximum Marks	2 Marks

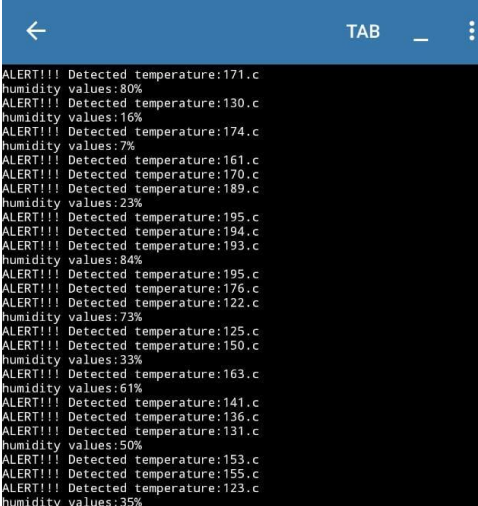

Question-1:

Build a python code, Assume u get temperature and humidity values (generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

Solution:

```
import random
import time
while(1):
    temp= random.randint(0,200)
    humidity=random.randint(0,200)
    if temp>120:
        print("ALERT!!! Detected temperature:"+str(temp)+".c")
        if humidity<100:
            print("humidity values:"+str(humidity)+"%")
            time.sleep(2)
```

```
1 import random
2 import time
3 while(1):
4     temp= random.randint(0,200)
5     humidity=random.randint(0,200)
6     if temp>120:
7         print("ALERT!!! Detected temperature:"+
8 str(temp)+".c")
9         if humidity<100:
10            print("humidity values:"+str(humidity)+"%")
11            time.sleep(2)
```

```
← TAB _ ⋮
ALERT!!! Detected temperature:171.c
